

# Stronger Together

JB POINDEXTER & Co

A Message from the CEO \_\_\_\_\_

# Stronger Together

J.B. Poindexter & Co. (JBPCO) was founded on principles of long-term growth, innovation, and operational excellence. What began with acquisitions in the manufacturing and automotive sectors has grown into a multi-billion-dollar business.

Our success is built on more than our financial accomplishments – it's built on the trust we've earned from our customers, the dedication of our team members, and the strength of our partnerships. We do not merely acquire businesses; we cultivate their strengths, building for sustainable growth rather than short-term gains. This approach has seen us through four economic recessions, and it will continue to guide our future endeavors.

JBPCO has become the largest producer of commercial truck bodies and accessories in North America. Our products are integral to the essential mid-mile and last-mile delivery networks that sustain modern commerce. Simply put, without the trucks and vehicles we manufacture, a significant portion of today's supply chain would face disruption, impacting industries and everyday consumers across the board. With a commanding share of 50% in medium-duty truck bodies and 65% in the walk-in step van markets, our impact on modern commerce is undeniable.

None of this would be possible without the unwavering commitment of our team, the trust of our customers, and the shared vision of our partners. Together, we have built a platform that leads in innovation, creates lasting value, and makes a positive difference in the industries and communities we serve.

As we look toward the future, I remain confident that, together, we will continue to drive progress, support one another, and leave a legacy that will last for generations to come.

John B. Poindexter

## Solutions That Drive Business

At J.B. Poindexter & Co., we power the businesses that keep everyday necessities running.

Our products are essential to the modern commerce that millions of people rely on daily. Without delivery trucks, at-home shipments wouldn't reach their destinations. Without work trucks, core utilities would be disrupted. Without carefully constructed protective packaging, those in need of critical medical supplies would be left vulnerable. We keep supply chains moving and fuel the industries that drive our economy.

The strength of JBPCO lies in the collective power of our business units. Each one is empowered to build on their strengths and innovate advancements so that customers can continue to confidently rely on the products and services we deliver. Together, we provide solutions that impact lives every day.

This responsibility is one we take seriously, because at the end of the day, it's the people who depend on us that drive everything we do.

## Building a Better Tomorrow

With a workforce of more than 8,500 and more than 42 manufacturing operations spanning North America, the JBPCO portfolio includes work trucks, upfit solutions, protective packaging, and manufacturing solutions that communities and economies rely on.

Our growth has come from a bold readiness to embrace challenges and seize opportunities. Our philosophy goes far beyond the bottom line—it's about empowering the businesses we acquire to thrive, building on their strengths and ensuring they are positioned for long-term success. Our purpose is clear: we're here to ensure the vitality of transportation systems, drive sustainability, and support the well-being of our team members. This approach has helped us secure a significant share of the market in truck bodies and delivery vehicles through trusted brands like Morgan Truck Body, Morgan Olson, and Reading Truck. By building enduring partnerships with suppliers, fleet owners, small businesses, owner/operators and transportation providers, we continue to create value across the industries we serve.

**MORGAN  
OLSON**

As we look to the future, we remain focused on delivering trust, reliability, and exceptional value to our customers. With centralized corporate functions and streamlined operational systems, we ensure efficiency and growth across our business units. Our strong financial stability and capital structure give us a solid foundation to expand our portfolio, drive innovation, invest in new opportunities, and enhance sustainability efforts. Through it all, we're committed to collaboration, quality, and continuing to provide best-in-class products and support. As we grow, our strong governance structure will guide us forward, allowing us to lead with confidence and build a future where we continue to push boundaries and drive industries forward.

## 2005

**FEDERAL EAGLE**

## Building a Better Today

Our commitment to growth is matched by our dedication to improving lives for our workforce and the communities around us. Through initiatives like the Women's Initiative Network (W.I.N.), we empower individuals to lead, thrive, and make an impact—both within our organization and beyond. Through donation drives, career presentations, and outreach programs, W.I.N. inspires and supports those in need while strengthening the communities we serve.

As a Veteran Owned Business, we honor those who have served our country by actively recruiting veterans and supporting their transition into meaningful careers. We also partner with a variety of charitable and professional organizations that align with our mission.

# Commercial Trucking

## Driving the World Forward

JBPCO is at the heart of the supply chain with multiple brands servicing the commercial truck market. Together, we have the most expansive manufacturing base in North America supported by the broadest distribution network. Through Morgan Olson step vans, Morgan truck bodies, Reading Truck work trucks, and LEER and Masterack upfits, we provide the full spectrum of commercial vehicle, upfit, and truck accessory needs in one place.

What sets us apart is our seamless integration of technology and innovation. With EAVX driving new advancements, we are proactively introducing technology that gives a single access point for monitoring and managing productivity, safety, power, and serviceability. Leveraging our vast automotive and engineering experience, we understand how important these factors are in ensuring fleet owners and drivers benefit from a more modernized system—built for today's demands and tomorrow's possibilities.

## CLIMATE ACTION & SUSTAINABLE COMMUNITIES | RESPONSIBLE CONSUMPTION AND PRODUCTION

We play a vital role in reducing greenhouse gas emissions and improving air quality. We're committed to action—our manufacturing plants recycle excess metal to minimize waste, EFP designs recyclable and environmentally responsible packaging solutions, and EAVX is advancing electric vehicle technology to boost efficiency and sustainability. Together, we're driving sustainability across all our processes to reduce the industry's collective impact on the planet.

## Bodies that Move Business

Morgan Truck Body is North America's leader in light- and medium-duty truck body manufacturing. Morgan enables families to move into their first homes, ensures grocery stores are stocked with food, and supports your favorite businesses by delivering the inventory they need to succeed. From agriculture and contractors to service providers and equipment haulers, industries depend on Morgan truck bodies to ensure work gets done, products are delivered, and communities thrive.

*Morgan's mission is to design,  
build, sell, and support the most  
reliable truck bodies in the world.*

**SCAN**

Morgan Truck Body

## Morgan in Motion

- Largest manufacturer of light- and medium-duty truck bodies in North America.
- More than 3,000 team members across 14 manufacturing locations and 8 service centers in North America.
- A state-of-the-art R&D center dedicated to prototype fabrication.
- Full vehicle body, sub-system, and component test capabilities along with design and verification of lightweight composite body materials.
- National network of authorized distributors and service, warranty, and repair centers.

Morgan's mission is to design, build, and support the most reliable truck bodies in the world, providing innovative middle-mile solutions that connect the world's supply chain. From dock to door, Morgan Truck Body is the preferred partner for keeping businesses moving and delivering consumer goods and services across North America.

#### **GOLD STAR**

Dry freight cargo delivery for big box and appliance delivery, furniture moving, rental fleets, municipalities, landscape, construction, glass hauling, airport services, catering, vending, business and home delivery, and more.

#### **COLD STAR**

Refrigerated cargo delivery designed for catering, floral, and food and beverage, whether business to business or home delivery.

#### **CITY MAX**

Final mile parcel van designed for HVAC, package delivery, rental fleets, and more.

#### **FURNITURE MOVER**

## Always Delivering

Without Morgan Olson step vans, crucial industries would struggle to get their jobs done. Holiday gifts wouldn't make it in time, leaving Christmas morning without the joy of unwrapping presents. Municipalities and utility providers wouldn't be able to serve the people who need them most. Businesses relying on uniforms and PPE couldn't equip their employees with the essentials to stay safe on the job.

But it's not just about delivering the goods—it's also about making the job easier for the people behind the wheel. Morgan Olson's iconic step vans are designed with the driver in mind. With ergonomic features that promote wellness, these vans make it easier for drivers to access packages and safely get in and out of the seat, even on the longest routes. Built for efficiency and comfort, Morgan Olson's vehicles keep final-mile delivery running smoothly, no matter the demand.

*Morgan Olson's mission is to always  
deliver on time the highest quality  
walk-in step vans and product  
solutions that help our customers'  
businesses always deliver.*

## Tailored Upfits Built To Last

Masterack is a trusted leader in designing and manufacturing commercial-grade upfit solutions that keep hard-working businesses moving. Specializing in cargo management systems for work vans and trucks, Masterack builds durable, efficient upfits that improve vehicle functionality for tradespeople and businesses of all sizes.

By providing convenient ways to secure tools and materials—and keep crews organized—Masterack's upfits ensure vehicles are fully equipped for success on the job. Contractors, delivery fleets, and businesses across industries rely on Masterack to boost productivity and protect valuable equipment. Always focused on staying one step ahead, Masterack is committed to innovation—solving problems before they arise and delivering solutions that meet the real-world needs of those who count on them.

*Through custom upfits, Masterack  
makes everyday tasks more  
efficient for fleets who rely on their  
vehicles to keep operations running.*

## Powering the Extraordinary

JBPCO's manufacturing capabilities extend beyond commercial trucking, delivering precision-manufactured components from MIC and EFP's protective packaging solutions that are critical to a wide range of industries. Whether it's custom or off-the-shelf packaging, temperature-controlled shipping solutions, or sustainable options like NatureKool®, EFP's products help pharmaceutical companies with what their patients need, as well as support the food supply chain to feed communities.

MIC's industry-leading precision machining and assembly services meet the rigorous demands of the industries they serve. From milling, turning, gundrilling, and e-beam welding, MIC's vertically integrated model optimizes efficiency and streamlines supply chains.

Our commitment to durability and innovation allows essential industries to thrive. From safeguarding delicate medical devices and frozen food with custom packaging to providing key components that power alternative energy projects and support aerospace and defense systems, JBPCO's manufacturing business units play a vital role in ensuring the success of industries that power the global economy.

## Precision Manufacturing for Critical Industries

MIC Group delivers precision machining and turnkey manufacturing solutions that power the industries that power the country. From oil and gas to power generation and transportation, MIC creates essential components that meet the strict performance and safety standards needed for critical operations. Without MIC's parts, power generation from solar, wind, and natural gas would face challenges in producing the energy needed to sustain the nation.

MIC's expertly crafted parts support industries worldwide, enabling them to take on the most demanding missions and applications. By providing high-performance solutions, MIC Group plays a key role in building a more sustainable future and ensuring the reliability of the systems that power everyday life.

*MIC's manufacturing capabilities  
help power the essential systems  
that drive modern life by providing  
dependable, high-quality components.*

**SCAN**   
to learn more about  
MIC Group

## MIC Group in Motion

- An 18-acre complex with specialized manufacturing services including electrical and mechanical operations, machining, automation, welding and inspection, and quality control.
- MIC Group utilizes concurrent manufacturing expertise, quick-turn prototypes, and production runs for quicker product development.
- Certified across ISO 9001:2015, AS 9100 D, ITAR Compliance, IPC-J-STD-001C (Soldering), IPC/WHMA-A-620 (Cable & Wire Harness), and IPC-A-610 (Electronic Assemblies).
- Full suite of specialized manufacturing including engineering design, precision machining, electron beam welding, precision manufacturing, milling, turning, electro mechanical assembly, integrated supply chain management, and more.

**TURNING**

Turning lathes allow an extra level of service to resolve challenges associated with part size, weight, and complexity.

**ELECTRON BEAM WELDING**

Advanced welding technique employs a high-energy electron beam to fuse materials with precision, resulting in strong, reliable joints essential for critical applications.

**MILLING**

Through extensive milling experience, MIC provides the best in quality through their 5-axis vertical mill and horizontal milling capabilities.

**MULTITASKING MACHINES**

Multitasking machines allow for higher productivity, shorter lead-times, and fewer errors on complex parts.

**ELECTRICAL DISCHARGE MACHINING (WIRE & PLUNGE)**

MIC can create complex shapes with high accuracy and machining of hard materials without direct contact.

**EFFICIENCY THROUGH INNOVATION**

Innovation is at the heart of everything MIC does. From designing smarter processes to improving lead times, MIC's innovative solutions help customers focus on what matters.

**ASSEMBLY**

MIC's assembly process integrates precision engineering, advanced tools, and rigorous testing to deliver seamless, high-performance components ready for industry applications.

**COMMITMENT TO QUALITY**

MIC delivers solutions that exceed expectations. MIC's expertise has helped customers improve workflows, reduce costs, and eliminate unnecessary investments.

## Protecting What Matters

EFP (Engineered Foam Packaging) leads the industry in high-volume molding, fabrication, and cold chain solutions, serving critical industries like pharmaceuticals and food.

By creating custom protective packaging, EFP plays a critical role in protecting the essentials that people rely on every day. From safeguarding medicine for loved ones to ensuring fresh food reaches families, EFP's solutions keep vital products safe during transportation. A host of temperature-sensitive items arrive safely and in the best condition for the people who depend on them because of EFP's relentless pursuit of excellence.

Committed to quality and sustainability, EFP leads the industry in creating sustainable and recyclable packaging solutions. By solving today's packaging challenges and building a more sustainable future, EFP helps businesses protect their products and deliver with confidence.

*With innovative, protective packaging and cold chain solutions, EFP helps businesses protect their goods during transit and ensure that the items that matter most reach their destinations without compromise.*

**SCAN** ►►

EFP

## EFP in Motion

- More than 800,000 square feet of manufacturing space with facilities located in IN, TN, AL, AZ, and SC.
- Through the eQUAL® product line, EFP provides insulated packaging, protection and temperature control for refrigerated, frozen, and controlled room temperature products.
- EFP offers cold chain transit times from 36 to 160 hours that include proprietary eQUAL® brand of pre-qualified parcel shipping containers.
- Trusted by top providers of pharmaceutical, life sciences, food, building products, agricultural, automotive, RV, and consumer products.

## Protective Packaging

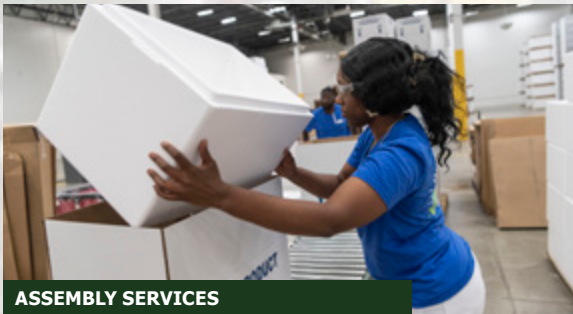

**CUSTOM SHAPE MOLDING**

EFP offers tailored molded shapes to meet specific packaging requirements, ensuring products are securely protected during transit.

**FABRICATION CAPABILITIES**

EFP's large variety of machinery aids in fabrication and provides unique solutions using various materials and manufacturing processes.

**ASSEMBLY SERVICES**

EFP's assembly process improves lead times, reduces overhead costs, and minimizes fulfillment and shipping errors, ensuring efficient mass production and delivery.

**WAREHOUSING & LOGISTICS SERVICES**

EFP is committed to carrying inventory, offering Vendor Managed Inventory (VMI), and workflow management, leading to faster inventory turns and higher in-stock options.

## Temperature Solutions

**COLD CHAIN SOLUTIONS**

EFP offers customizable and off-the-shelf cold chain products, including PharmaTuff®, eQUAL®, Gel Packs®, Climatedmp®, and NatureKool®.

**NATUREKOOOL**

NatureKool® provides a new environmentally conscious, temperature assurance packaging for the safe and efficient transport of temperature-sensitive products.

**CONSULTING SERVICES**

EFP's experts help clients design cold chain solutions to prevent temperature excursions.

**DESIGN AND TESTING**

EFP's certified lab uses advanced thermal modeling and qualification testing to guarantee packaging meets strict industry standards.
